## PROJECTS

### • Clothing Store – eCommerce Website

[Source Code](#)

[Live Site](#)

August 2021 – November 2021

- Built Using React, Redux, Firebase Auth, Firebase Firestore & Stripe Payments.
- Implemented better state management for future project scaling using Redux.
- Implemented better User Experience through animations, easier navigation and Mobile Responsiveness.

### • Restaurant Mobile App

[Source Code](#)

[Live App](#)

July 2021 – September 2021

- Built Using React Native, React Native Papers, Foursquare APIs.
- Integrated Maps for easier findings of user favorite restaurants.
- Micro-Interactions for better user experience.
- Implemented Restaurant Searching for nearby locations algorithm.

### • A.I. Brain – Face Recognition App

[Source Code](#)

June 2021 – July 2021

- Fetched and filtered data from 'FaceRecognition' API from Clarifai.com.
- Built a local server with Node and expressJS.
- Used Postgresql database for faster user data access.
- Used 'bcrypt' for encryption of user passwords while registering for better security.

### • Gaming Heaven Website

[Source Code](#)

[Live Site](#)

May 2021 – June 2021

- Auto Updating top Upcoming, Trending, and Most Popular Games website.
- Get to know everything about your favorite games coming on any platform. Worked with multiple API requests to get games data and animations for better UX.
