PROJECTS

• A.I. Brain - Face Recognition App

[Project Link](#)

June 2021 - July 2021

Fetched and filtered data from 'FaceRecognition' API from Clarifai.com and build a local server with Node and express and used Postgresql for the database. Used 'bcrypt' for encryption of user passwords while registering for better security.

• Gaming Heaven Website

[Project Link](#)

July 2021 - September 2021

Get to know about top Upcoming, Trending, and Most Popular Games. This website will auto-update for future game data. Get to know everything about your favorite games coming on any platform. Worked with multiple API requests to get games data and animations for better UX.

• Spock Rock Game

[Project Link](#)

August 2020 - October 2020

This game is based on 'Rock Paper Scissor' with two extra elements 'Lizard and Spock'. Users can play against A.I. or humans. There will be points for each round and a winner at the end. This project is Mobo responsive built with vanilla javascript.

• Instagram React Native App

[Project Link](#)

September 2021 - Present

This App is built with React Native for both Android and IOS. It deals with multiple users' data and showing them as posts, profiles, etc. Implemented Styled-Components Advance Themening for app scalability and micro animations for better UX.

• Math Sprint Game

[Project Link](#)

October 2020 - November 2020

Users need to choose the no. of questions and solve them as fast as they can because the ranking system is based on time. Test your math skills in the game. Built to sharpen Math Skills with responsive UI.
